

Dreiwege-Kugelhähne aus Messing

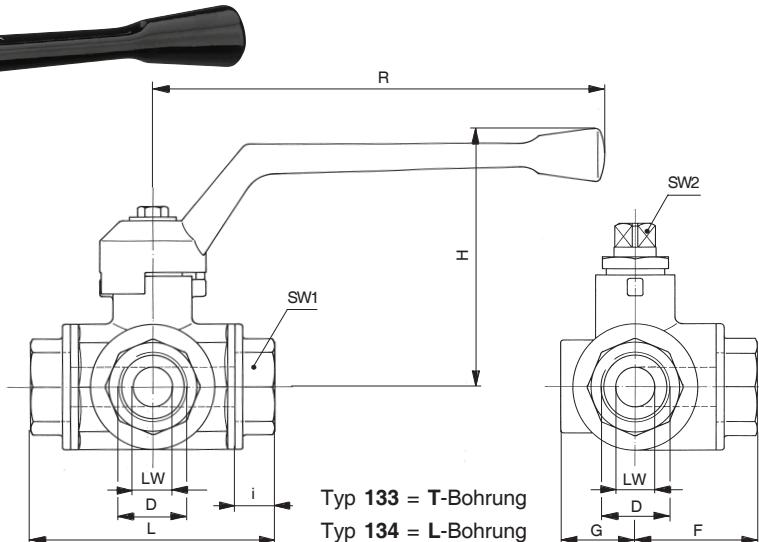

three-way brass ball valves

reduzierter Durchgang, T- oder L- Bohrung
reduced port design, T- or L- Option

Baureihe
133/134

R 1/4 - R 2

DN 40 + DN 50

Konstruktions-Merkmale

- reduzierter Durchgang
- einstellbare Stopfbuchse
- schwimmende Kugel
- allseitig abgedichtet

Material:

Gehäuse: Messing vernickelt
Kugel: Messing verchromt
Kugeldichtung: PTFE
Spindeldichtung: PTFE
Griff: Aluminium, schwarz lackiert

Temperaturbereich:

-20°C bis + 150°C
(abhängig vom Betriebsdruck)

Verwendung:

Druckluft, Wasser, Dampf, Lösungsmittel,
Heizöl, Kraftstoffe

Bemerkungen:

Durchflussrichtung beliebig.
Lage der Kugelbohrung ist an Einfrässungen am
Spindelvierkant ersichtlich.
Stopfbuchsmutter muss in zeitlichen Abständen
nachgezogen werden.
negative Überdeckung

Verschiedene Schaltstellungen siehe Übersichtsblatt
Seite 1.3.1

Grundeinstellung: L = 1
T = 3

Design features

- reduced port design
- adjustable stem packing
- floating ball
- 4 ball seats

material:

body: brass nickel plated
ball: brass chrome plated
ball seal: PTFE
stem seal: PTFE
handle: aluminium, black painted

working temperature:

-20°C to + 150°C
(depending on working pressure)

suitable for:

compressed air, water, steam, solvents, fuels

remarks:

any flow direction possible.
position indication on top of the stem recognizable.

gland nut must be adjusted in intervals.

mixed during actuation

Different switch positions see table on page 1.3.1

basic position: L = 1
T = 3
